Digital Camera
Sensor Cleaning

Trust The Science

There is only one Sensor Brush™

VisibleDust is quickly becoming the consumer's first choice for Digital Camera Sensor Cleaning. We research and test all current and new sensor cleaning products to ensure complete, edge-to-edge sensor cleaning.

VisibleDust is a Canadian company...which uses its knowledge and research of biochip technology to advance the science of removing dust from the surface of delicate objects such as Digital SLR sensors.

Attracting protein and DNA to the glass-like surface of a biochip for attachment requires special preparation of the surface. Because dust has many common characteristics with DNA, our DSLR sensor cleaning products are able to utilize the same technology.

Digital Cameras naturally attract particles in respect to electrostatic charges produced by the sensor. The terms: CCD, CMOS, DSLR Sensor, Digital SLR Sensor are all common terms when referring to a digital camera sensor, however; there is only one Sensor Brush™.

New Sensor Cleaning Products from VisibleDust

Arctic Butterfly™ SL 700 **NEW**

*** Patent Pending ***

The Arctic Butterfly™ SL 700 is an entry DSLR sensor cleaning tool for more budget orientated consumers. The Arctic Butterfly™ SL 700 is compact and can be easily fitted into the photographer's pocket. [\(more info\)](#)

Arctic Butterfly™-724 Bundle **NEW**

Our Philosophy is to make sensor cleaning effortless, safe and quick as possible. Because you take the pride in shooting images, we take the time to research the products we bring to the market.

Our Strength lies within continuous research and development, dedicated staff and great customer support.

VisibleDust Products are specialized in Digital Camera Sensor Cleaning (DSLR Sensor Cleaning) with care and attention.

VisibleDust DSLR Sensor Cleaning Products are of high technology and excellent performance. Sensor Brush™, Sensor Clean™, Chamber Clean™, Lens Clean™, Smear Away™, VDust Formula™, Arctic Butterfly™-724, Sensor Brush™ and Spinning Device are the first digital Sensor cleaning products of their type to remove dust, dirt and other particles effectively from the sensor.

Our Newest Addition to this line of excellent products is the VisibleDust Swabs. The VisibleDust Swabs have gone through extensive testing to ensure the best edge-to-edge sensor cleaning. Our Swabs have been specifically designed to compliment our wet sensor cleaning products.

What reviews have to say about VisibleDust Sensor Cleaning products?

Sensor Brush, Sensor Clean help keep your pictures dust-free. Finally! A digital SLR sensor cleaner that really works.

.....Rob Galbraith

In September 2006, I trekked to Amboseli National Park in Kenya, Africa. Hands down, it was the dustiest place I have ever been on the

VisibleDust Sensor Brush™

- Is not a sweeper brush
- Lifts dust contrary to sweeping
- Was designed from the ground up for Professional Sensor cleaning
- The #1 recommended DSLR cleaning tool by world wide professional photographers and reviewers

planet. The Arctic Butterfly saved the day in keeping dust spots out of my pictures – and saved me hours of time retouching my images, especially my landscapes, in the digital darkroom.

Travel photographer Rick Sammon, author of 27 books and 7 Adobe® Photoshop® DVDs

[VisibleDust at Photokina](#)

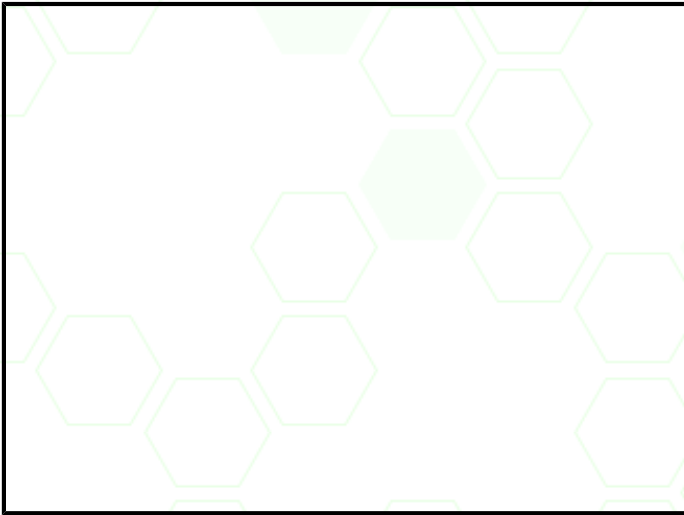

To my mind the best sensor cleaning tools on the market are from VisibleDust. My review of their products describes how they work and what they do. They have been the mainstay of my sensor cleaning since they first came to market in late 2004.

.....Michael Reichmann

The folks at VisibleDust are looking out for us! The Arctic Butterfly (crazy name) is a great sensor cleaning brush for the traveling photographer. With a push of a button..

.....Moose Peterson
